How to Setup on a Home Computer

Step 1: Install Git & Node.js

Make sure your home computer has Git and Node.js (version 18+ or 20+ recommended) installed.

Step 2: Clone the Codebase

Open your Command Prompt or PowerShell, and run:

```
git clone https://github.com/LaminatedYamal/PortfolioPC.git
```

Step 3: Install Dependencies

Go into the project folder and install modules:

```
cd PortfolioPC
npm install
```

Step 4: Configure Local Credentials

Create a file in the project folder named **.env.local** and add:

```
NEXT_PUBLIC_SANITY_PROJECT_ID=dkwgoenb
NEXT_PUBLIC_SANITY_DATASET=production
NEXT_PUBLIC_SANITY_API_VERSION=2024-01-01
```

Step 5: Start Development Server

Run the dev script to view your website and studio:

```
npm run dev
```

Sanity Studio Access & Custom Icons

Sanity Studio is embedded directly into your Next.js project. You can access it locally while the development server is running, or host it.
