1. Brand Context

1.1 History of Koenigsegg Automotive AB

Koenigsegg Automotive AB is a Swedish manufacturer of high-performance hypercars.

performance, founded in 1994 by Christian von Koenigsegg, then just 22 years old.

Driven by a passion for automotive engineering, his goal was to create the ultimate sports car perfect. The company's headquarters are located in Ängelholm, Sweden, in a former military hangar, currently transformed into a technological center of excellence.

Inspired by models such as the McLaren F1 and the Ferrari F40, Christian developed the first prototype, the Koenigsegg CC, in 1996. The first production model, the CC8S, was launched in 2002, equipped with a 655 hp V8 engine, and was distinguished by its Guinness World Records as the production car with the most powerful engine at the time.

Since then, the brand has consolidated itself in the hypercar segment, through flagship models and pioneering technologies:

●■ CCX (2006): Developed to comply with United States standards, it allowed access to new markets.

●■ Agera (2010): Reached 1,341 hp and, in 2017, set the world record for speed at 447 km/h.

●■ Regera (2015): Introduced the Koenigsegg Direct Drive (KDD) hybrid system, exceeding 1,500 hp.

●■ Jesko (2019): Focused on track performance, can exceed 1,600 hp.

●■ Gemera (2020): The brand's first four-seater model, combining comfort, innovation and hybrid engine.

Koenigsegg distinguishes itself through precision engineering, artisanal production and constant innovation. Technologies such as dihedral synchro-helix doors, fiberglass chassis internally produced carbon and more efficient engines reinforce its status as global reference in the sector. Under the visionary leadership of Christian von Koenigsegg, the brand remains faithful to its mission: to create the most advanced, exclusive and innovators in the world.

1.2 Essence (Brand Key Framework)

The Brand Key Framework is a structure that helps brands be able to define their strategy, tone of voice, among other aspects (Appendix, image 1).

This structure is made up of 9 components which are:

The essential strength, which consists of the identity and essence of the brand.

The competitive environment, which is the analysis of competition in the market where the brand is found.

The ideal target audience, which are the people we want to reach.

The benefits for the consumer, which is where the brand shows the customer why choose this brand over the competition.

The values, beliefs and personality, which consists of the principles and beliefs that will guide the decisions made by the brand.

And finally we have consumer perception, which is the current image of the brand and how the public sees the brand.

1.3 Marketing Mix

Koenigsegg positions itself in the luxury hypercar segment, targeting a highly exclusive and demanding audience. Your marketing strategy reflects this positioning, investing in selective communication, in a personalized sales model and an offer focused on innovation, performance and exclusivity.

Product:

Luxury hypercars, highly personalized, with maximum focus on performance, technological innovation and exclusivity.

Price:

Average price of 2.5 million euros. Targeted at individuals with great power economical, inserted in an ultra exclusive segment.

Distribution (Place):

Sales made by private appointments or through brand showrooms, located in strategic locations globally.

Promotion:

Communication based on “Word of mouth” between customers and enthusiasts, reinforced through strategic partnerships, automotive events and presence in specialized media, both digital as well as traditional.

1.4 Social Media Audit

The six main social networks were analyzed: TikTok, YouTube, X (formerly Twitter), LinkedIn, Facebook and Instagram. The analysis began with a general review of the brand activity in the months of December, January and February.

Quickly, some key points were highlighted:

- Instagram and Facebook demonstrated greater consistency in publications, even though with some irregularity;
- No content schedule was identified, which reveals the absence of a strategic digital communication plan;
- The remaining platforms, LinkedIn, YouTube, X and TikTok, showed signs of disinvestment or abandonment.

With this overview, the analysis moved towards a more specific approach, with focus on quantitative data and types of content, as shown in images 2 and 3 of the annex.

LinkedIn

Identified as the brand's most recent network, it had the lowest number of publications and followers. For a luxury brand, this absence represents a opportunity to explore.

Given the professional nature of the platform, LinkedIn would be ideal for reinforcing institutional image, highlighting themes such as innovation, engineering, organizational culture and sustainability, topics valued by investors, partners and qualified talent.

Despite limited activity, relevant content was shared such as fundraising campaigns, commemorative dates and internal events, revealing a most human and authentic facet of the brand.

X (Twitter)

It was the platform with the most accumulated publications, but practically inactive since 2023. Given its misalignment with the brand's positioning, it was excluded from strategic priorities. The content focused on links to YouTube, merchandising, behind the scenes and third-party republications.

YouTube

Despite the reduced frequency of publications, the channel recorded good levels of interaction. Videos, focused on behind the scenes and the production process, gain relevance when presented by the CEO himself. One of the contents exceeded half a million views, confirming the platform's potential for more technical topics, as long as well executed.

TikTok

It showed the highest growth in followers per post, despite only 5 of the 57 publications occurred in the last year. Content included events, behind-the-scenes and interaction with followers. This network demonstrated strong potential to attract more young people and innovation enthusiasts.

Instagram and Facebook

These are the channels with the brand's biggest investment in content creation and relationships with the community.

Although Facebook has a similar volume of publications, it is mostly content replicated from Instagram, resulting in less interaction. So, the analysis of Facebook was closed at this stage.

Instagram was analyzed in greater depth, with the aim of understanding the evolution of the brand's presence, especially after observing, on LinkedIn, the focus on more human and internal content that is unusual in a sector marked by exclusivity and performance.

Therefore, image 4 of the annex presents the conclusions of the platform analysis,

Below is a summary of them.

Analysis revealed a clear shift in the message communicated. Koenigsegg went from a more personal, authentic and oriented communication to the human side of brand, for a more product-centric approach and the idea of performance.

Even though the CEO's sporadic presence maintains a certain emotional bond, which is considered the face of the brand, other essential elements such as the team, customers and moments from the company's daily life are no longer part of the narrative. For our agency, this is a distinctive and valuable point that has been lost, but which continues to be a opportunity that deserves to be explored again.

Other relevant observations were also identified:

- Most publications consist of photographs from third parties, which demonstrates a accentuated dependence on external content.

●■ Photographs that highlight the details of the vehicles — both interior and exterior — generate higher levels of interaction.

Finally, in terms of DO'S and DONT'S, regarding the construction of content, the conclusions are presented in image 5 and below once again their summary.

Regarding the construction of content on Instagram, it was concluded that publications that performed best in terms of reach and engagement were those with aspirational and inspiring content, direct participation from the CEO and product highlights unique and exceptional performance.

Finally, with regard to presence in Paid Media, it was noted that there was no total investment by Koenigsegg. No campaigns were identified in the Google Ads, TikTok Ads, YouTube Ads or Meta Ads, there was no evidence that they had been carried out previously.

1.5 SWOT Analysis

2. Competitor Analysis

2.1 Pagani

2.1.1 Marketing Mix

Next we find Pagani, which despite also producing hypercars exclusive and luxurious does so with a slightly different objective, focusing more on feeling of driving and the idea that a car can be art (if it weren't for this brand Italian) through the use of more traditional materials and a more traditional design language. romantic and less “functional”.

When we talk about value, Pagani also sees its average price positioning itself in the two and a half million euros, which means that it competes to “seduce” the same type of buyer.

Just like Koenigsegg, the Italian brand also reaches its potential buyers through their own “showrooms” or private appointments that they “service” in their factory in Modena.

Its promotion is done in the same way as the Swedish competitor, in which the direct and personal communication is important and reach in terms of traditional marketing is still strong.

2.1.2 Social Media Audit

Visual representation in images 6 and 7 of the annex.

Regarding its digital presence, Pagani is active on the six main platforms.

However, upon initial analysis, it became apparent that only Instagram warranted further study, due to the consistency of publications and the quality of insights obtained in this network.

The analysis began by identifying the main themes and editorial line adopted. The content is grouped into three main categories:

- Virtual showcase: presentation of vehicles in visually striking scenarios, highlighting the aesthetics and presence of the models;
- Internal exhibition: focus on the technical and personalized details of the interior of the automobiles;
- Action shots: images of cars in motion, in iconic locations or recognized, highlighting performance and design.

A differentiating aspect compared to the competition was also highlighted, especially in relation to Koenigsegg: the use of copy. Pagani adopts a more formal and professional tone, consistent with a more exclusive and luxury positioning. This choice may be related to the identity of the founder, Horacio Pagani, whose Italian heritage is reflected in a more poetic and reserved communication.

This approach results in two main conclusions:

- 1.■ The sophisticated tone reinforces the artistic and premium perception of the brand, but reduces the level of public interaction;
- 2.■ Pagani follows an omnichannel strategy, with uniform content across all channels platforms — LinkedIn, Instagram or TikTok — maintaining the same style and message, regardless of the target audience or the nature of the network.

Other relevant observations include the consistency in frequency of publication. Although the total number of publications is relatively small, the brand publishes weekly, maintaining a regular rhythm. Like Koenigsegg, Pagani does not use paid advertising (paid media), as it does not use social networks as a channel for direct sales.

Finally, it was observed that the textual content of publications (copy) is based often in testimonials, descriptions of the technical and aesthetic attributes of products, as well as in poetic and philosophical phrases with which the CEO himself identifies.

2.1.3 SWOT Analysis

Strengths

Extreme exclusivity: limited production, special editions and customization unlimited.

Design and strong identity: Italian influence, analog philosophy and Horacio Pagani as ambassador.

Prestige in the market: strong appreciation in the secondary market and strong partnerships (AMG, Dallara).

Experience on the track: models such as Zonda R and Huayra R reinforce performance extreme.

Weaknesses

Limited reach: weak global presence and reduced distribution network.

Technological delay: no hybrids or electrics, configurator inactive.

Weak digital communication: inconsistent marketing and reduced notoriety.

Small operational capacity: specialized but slow team.

Very high prices: restricted to a very select audience.

Opportunities

Market growth: global increase in millionaires and interest in brands niche.

Strategic partnerships: collaboration with Mercedes-AMG or motorsports.

Digital expansion: improvement in social networks and reactivation of the configurator.

New segments: possibility of launching a Hyper-SUV.

IPO: going public to finance innovation and growth.

Threats

Emerging competition: Chinese brands entering the segment.

Dependence on suppliers: risk in the relationship with AMG.

Regulatory changes: environmental pressure and restrictions on ICE engines.

Disconnection with new generations: image may seem old-fashioned without innovation digital.

Economic vulnerability: crises can affect sales and investment in R&D.;

2.2 Bugatti

2.2.1 Marketing Mix

The third brand we talk about is Bugatti, this brand has more than one century of history in this industry and has always focused on producing high-quality vehicles performance, something that he still does today, even though at this moment the search for performance maximum is secondary to the creation of “status symbols” that are easily identified until by those with little interest in automobiles.

This automotive pedigree and “status symbol” image comes at a price, this price catapults Bugatti to the first position in the average cost ranking (of the brands discussed here) when producing cars that cost, new, an average of three and a half million of euros, which represents a difference of one million euros compared to the “opponents” direct.

Unlike the brands discussed so far, this French “house” adds to the private appointments and “showrooms” the possibility of purchasing one of these vehicles through “authorized dealers” who have a very small number of allocations but who allow the brand a little more reach.

The promotion strategies are very similar, with only Bugatti standing out due to the fact that their clients tend to be public figures with greater online presence and fame.

Like other brands, traditional marketing continues to be widely used.

2.2.2 Social Media Audit

Visual representation in images 8, 9, 10 and 11 of the annex.

As already mentioned, this is a brand with a notable legacy — among all competitors, is the one with the richest and most consolidated history. The general analysis revealed a active presence on the six main social networks, with more than one million followers across all except LinkedIn.

It also stands out for leading in number of followers on Instagram and Facebook.

This strong positioning, combined with its historical prestige, places the brand clearly above of Koenigsegg and other direct competitors. For this reason, the analysis went deeper

on Instagram, YouTube and LinkedIn — the most relevant platforms for defining communication strategy.

Instagram

The brand has high consistency in the frequency and time of publications, with a regular calendar — especially on Tuesdays, Fridays and Sundays. The main themes observed were:

- Partnerships with brands from other sectors;
- Presentation of vehicles in natural and less staged visual contexts;
- "Legacy", with emphasis on historical and collection models;
- "Action shots", focusing on performance on the track;
- Reposts from external photographers that reinforce the brand's luxurious image.

It was found that carousels generate more interactions than Reels — a fact relevant to future content creation.

YouTube

Despite having fewer followers, YouTube has a higher interaction rate superior to Instagram, revealing a more segmented and demanding audience. Keep the "action shots", now on video, and content about the brand's legacy. Also noteworthy is the behind the scenes, with interventions from senior management, always focused on products. A Bugatti's omnichannel strategy is clear: content is adapted across platforms — for example, videos turned into carousels on Instagram. Titles with keywords such as breaking, record or model names have been shown to generate greater reach. The absence of a representative human figure reinforces an institutional positioning, focused on product.

LinkedIn

In this network, themes of legacy, behind-the-scenes production and partnerships stand out — adjusted to the professional profile of the public. The brand reinforces its authority and credibility through technical and in-depth content. Also noteworthy is the effective use of storytelling, associating the locations of the photo shoots with the history, values and identity of the Bugatti.

2.2.3 SWOT Analysis

Strengths

Rich history and strong identity: more than 100 years of heritage and a portfolio of iconic models.

Dominant digital presence: largest number of followers on social media among compared brands.

Exclusivity with scale: limited production but more affordable than direct competitors.

Solid strategic partnerships: support from the VW Group and connection with Rimac.

Robust marketing: consistent media presence, celebrities and virality historical (e.g. Veyron).

Ultra-luxurious experience: highly valued “bespoke” approach.

Weaknesses

High price and limited accessibility: restricted market and lower appreciation long term.

Lack of recent proprietary innovation: depends on partnerships for advancements technological.

Contradictory image: it appeals to exclusivity but with wider production than the rivals.

Unstable CEO: absence of a visible and constant “face” for the brand.

Track performance below expectations: focus on power and luxury, less on driving pleasure.

Opportunities

Growth of the luxury market: global increase in millionaires and appreciation of the secondary market.

Bet on EV and technology via Rimac: it can redefine Bugatti as a brand future.

Digital update: public configurator and investment in software would improve user experience.

Exploring new segments: The stigma surrounding luxury SUVs is decrease.

Threats

Fierce competition: new Chinese brands and changing consumer preferences consumers.

Management risks: constant leadership rotation and possible cultural clash with Rimac.

Economic instability: recessions and rising costs affect investment and margins.

Environmental issues: emissions standards can hinder sales and affect image.

2.3 Conclusion to the Initial Analysis

Therefore, after all the analysis of the brand — in terms of history and essence — combined evaluating the marketing mix, social networks and SWOT analysis, not only for Koenigsegg as well as the competition, it was possible to derive a series of insights. Some say respect for DO's and DON'Ts in content creation, based on competitive practices that demonstrated different levels of effectiveness; others revealed weaknesses and opportunities that the brand can and should explore in future campaigns. And finally, it emerged a central insight.

This last insight was decisive for the construction of the entire campaign that was follows, offering us a new strategic vision:

"In the hypercar market, those who see engines don't see hearts. Communication It's not human."

In other words, we found that most competing brands favor exaltation of performance and product to the detriment of more emotional communication, close and human. This distancing creates an opportunity that Koenigsegg can — and must — explore, as it has a differentiating asset: a passionate CEO, with a humble and inspiring journey, and a small but united team, made up of professionals who love what they do. Each vehicle is custom, unique and hand-built, which gives authenticity and emotional value to the brand.

Given this scenario, and with the conviction that Koenigsegg has a base solid and human to distinguish itself, the objective is to reposition the brand's branding.

Without compromising its essence, we intend to reformulate the message with the following slogan:

Designed and Engineered by Dreamers

The entire process — from design to production — is led by a team of passionate dreamers. A small group, but driven by dedication and pleasure genuine for the work he does. This is the message that the brand must convey: it creates unique products, with exceptional performance and attention to detail, but none of them would be possible without the people behind it. The objective is to value the role of the team and the CEO,

introducing a more human side to communication — something that followers, fans and consumers can truly identify themselves.

In this way, we move on to the next step of the analysis: the analysis of the target audience.

In order to create personas that reflect reality as best as possible, we chose for analyzing the two networks with the greatest diversity and audience reach — YouTube and Instagram — and LinkedIn, a strategic platform to consolidate authority in the sector.

2.4 Target Audience Analysis

Having already defined the message, we proceeded to analyze who best identifies with with her. To this end, three complementary approaches were used:

- 1.■ General analysis of social networks, through consultation of studies on the profile of users of the platforms in question, with a special focus on age groups and other relevant demographic data that would help us guide the investigation;
- 2.■ Consultation with Artificial Intelligence (ChatGPT), with the aim of crossing data general information with more specific information about the audience in our sector — that of hypercars;
- 3.■ Social Listening, focused on the social networks under analysis, with the aim of carrying out a critical comparison between directly observed data and that provided by the ChatGPT.

The combination of these three strategies was due to the natural limitations of information available about our niche. Although there are credible studies from recognized sources, most do not directly address the hypercar market, which conditions the depth of the analysis.

As for using ChatGPT, we recognize its advantages — such as speed and the ability to synthesize information — but also its limits: it works with estimates based on general patterns, common sense, and trained knowledge, which can generate plausible answers, but not always exact or rigorous.

Finally, Social Listening, although considered the most realistic and direct source, presents its own limitations: not all platforms provide public profiles complete, which makes critical analysis of the comments difficult. Furthermore, the high volume of interactions would require exhaustive manual analysis to obtain statistically significant conclusions. robust.

Still, despite these challenges, the information collected allowed us to arrive at solid conclusions, with a high degree of probability of being aligned with reality current brand.

2.4.1 Social Media Analysis

With this framework defined, we then moved on to the analysis by social network, starting with YouTube.

YouTube

According to data from DataReportal's most recent study, YouTube has

2.5 billion users, of which 46% are women and 54% are men. A distribution by age groups reveals a high representation in all segments, with greater emphasis on the ranges of 25-34 years old (21.7%), 35-44 years old (18.5%) and 18-24 years (15.8%).

Using this data as a basis, we seek to obtain more specific statistics for the Koenigsegg market, using ChatGPT. This tool allowed estimating the distribution of followers by age group and identify the type of content this audience demand in the context of the automotive sector. The information collected was summarized in the image 14 of the attachment.

In order to validate the credibility of the information, a survey was carried out for additional studies. Despite some limitations, we found a study on the Top 10 of YouTube channels in the Auto & Vehicles category, the conclusions of which can be found in image 15. In this same image we also included a social listening analysis: examined comments on two Koenigsegg videos — one focusing on adrenaline and emotion, another of a more technical nature, presented by the CEO.

We conclude that the data provided by ChatGPT is partially confirmed, since the videos attract comments from different profiles: people who dream of one day own a Koenigsegg; aspiring to work for the brand or in the automotive sector; enthusiasts of technical content and even individuals who felt inspired to pursue this career. In short, YouTube allows you to reach a wide audience — both in terms of age and types of interest. The limitation to the video format is, in fact, an advantage: it allows content more interactive, whether they are shorts or long videos, the latter being ideal for exploring technical topics in more depth.

Instagram

In the case of Instagram, there are some differences in the percentages of users by age group. According to the same source, the platform has 1.74 billion users, with a distribution of 47.3% women and 52.7% men. Usage is more expressive between the 25-34 age groups (33%) and 18-24 age groups (31.4%).

Using ChatGPT again, we tried to understand how this data fits together apply to the Koenigsegg public. It was found that the age groups maintain percentages similar to those of YouTube and that the type of content sought continues to reflect the balance between technical information and emotional inspiration.

No studies were found that supported the data provided by AI, so that we exclusively applied the social listening methodology. Two types were analyzed of content: one more technical and performance-oriented, and another with a focus on aspirational lifestyle. The first captured the attention of a more knowledgeable public than sector, including specialized influencers; the second proved to be effective with an audience that values luxury and lifestyle, with many expressing the desire to one day own a Koenigsegg.

Broadly speaking, Instagram attracts a younger audience and offers potential for building an active community. It is also an ideal platform for partnerships with influencers, since there are profiles with different scales of reach, adjustable to different communication objectives.

LinkedIn

Finally, we analyzed LinkedIn. According to DataReportal, the platform has 1.2 billion users, with a division of 43.1% women and 56.9% men. Unlike previous platforms, LinkedIn has greater use by older age groups: 25-34 years (47.3%) and 35-44 years (20.7%).

According to ChatGPT, the presence is predominant among professionals who seek to consolidate knowledge and create contact networks in their sector — in this case, the Auto & Vehicles market. An additional study revealed that the most popular topics on LinkedIn includes innovation (#2), technology (#6) and future (#8) — areas that make total meaning in the context of Koenigsegg.

As with Instagram, the lack of additional studies led us to apply the social listening. Three types of publications were analyzed, concluding that the majority of followers work in the area or in adjacent sectors. Also noteworthy is the publication about the university program, which generated comments from professionals from other areas who

demonstrated that they see Koenigsegg as more than just a manufacturer of automobiles.

Thus, LinkedIn is made up of individuals at the beginning of their career or looking for new challenges, with innovation being the dominant theme, which fits perfectly into the strategy of Koenigsegg, which seeks to reinforce its notoriety in the sector.

We conclude, therefore, that the three platforms analyzed: YouTube, Instagram and LinkedIn has an impact on a young audience and also on an older audience established, with purchasing power or influence in the sector. This demonstrates that, regardless of age group, there is a direct or aspirational connection with the market of hypercars and with the Koenigsegg brand.

It was based on this analysis that we proceeded to define the “personas” that follow.

2.4.2 Personas

Persona 1 – The Engineering Enthusiast – Liam (Attachment, image 12)

- Age: 26 years old.
- Location: Munich, Germany.
- Sex: Male.
- Marital Status: Single.
- Children: None.
- Occupation: Mechanical Engineering Student/Mechanic.
- Income: €40K–€70K.
- Objectives: Deepen technical knowledge, especially about hybrid technology and innovative design (e.g. Koenigsegg Regera).
- Values: Precision, innovation, sustainability, continuous learning (Life Long Learning).
- Information Channels: Magazines (Car and Driver, Top Gear), YouTube Koenigsegg technical, engineering blogs, Events (Formula 1, technical exhibitions), Platforms (YouTube, LinkedIn, Reddit).
- Challenges: Limited access to affordable technical analysis.
- Pain Points: Technical complexity can be overwhelming for learners.
- Objections: Difficulty accessing advanced technical details.

Persona 2 – The Wealthy Collector – Alexander (Attachment, image 13)

- Age: 55 years old.

- Location: Dubai, UAE.
- Sex: Male.
- Marital Status: Married.
- Children: 2 sons, 23 and 25 years old.
- Occupation: Real Estate Businessman.
- Revenue: €30M–€100M.
- Objectives: Invest in exclusive Koenigsegg models.
- Values: Exclusivity, rarity, luxury, appreciation, status.
- Information Channels: Robb Report, Forbes Lifestyle, collectors' blogs, High-end events, Koenigsegg networks, Platforms (YouTube, Instagram, LinkedIn/X).
- Challenges: Access to ultra-rare models.
- Pain Points: Anticipating trends and making good investments.
- Objections: Resale value compared to other luxury assets.

Taking into account our target audience, which is vast, we decided to “extract” these two personas that we believe best represent our audience.

On the one hand, we have a student in the area who is interested in vehicles and innovations that leave the Swedish house, that follows us on Youtube, Instagram, LinkedIn and X.

Despite not yet having the purchasing power for one of our vehicles, Liam seeks to stay informed regarding developments that Koenigsegg announces and which has repercussions on the rest of the industry. Whether through “deep-dives” that you consume in youtube, inspirational content that you consume on Instagram or through posts “authority” still technical but without the depth of the “deep-dives” that he observes in LinkedIn.

On the other hand, we can also find an audience that is more similar to Alexander, an eccentric collector with the means to acquire the most exclusive to the brand, due to its income from the mediation business luxury real estate in the United Arab Emirates.

Even though his schedule is busy, Alexander spends some of his time at LinkedIn where you interact with your “network” (your industry and customers but also with other car enthusiasts) and where you can keep up to date with Koenigsegg news, at overwhelming majority of the time with the aim of getting to know the models or editions specials that have just been announced.

Also spend some time on Instagram where you can find out a little more about aesthetics and technology of these models but if the objective is to reinforce your knowledge about any of these works of art, the tendency will be for you to take a “deep-dive” of the version (Jesko Absolut, for example) in order to make a more informed decision in regarding your next investment.

2.5 Strategy

Once the analysis was completed, the team constructed a differentiating message to the competition, identified the target audience and developed personas representative of the same, and having also determined the most effective platforms for communicate with this audience, now is the time to present the campaign where all these discoveries and strategic decisions will be put into practice.

The defined objective is to launch a new vehicle, which is assumed as a relevant milestone for Koenigsegg: this will be the tenth model launched to the public and coincides with the celebration of the brand's 25 years of existence, a moment symbolic that reinforces its legacy and positioning in the hypercar market.

Before creating the campaign content, it was necessary to structure four fundamental elements that ensure the coherence and effectiveness of communication:

- Golden Circle – where it is defined how the brand message will be communicated, starting from “why” to “what”;

- Tone of Voice – which guides the style of texts to be used, aligning language and emotion with the new human positioning of the brand;

- Mood Board – which establishes a coherent and controlled aesthetic line for all the campaign's visual pieces;

- SMART objectives – which allow you to measure the success of the campaign through goals specific and concrete KPIs.

In the following subtopics, we detail each of these strategic pillars.

2.5.1 Golden Circle

The Golden Circle is a framework used to define communication in a brand. He argues that this must be built from the inside out, that is, it must start for communicating your values and purpose before presenting your products or services. This approach is particularly effective because it strengthens the emotional relationship with the public, creating a more human, authentic and differentiating brand image. Node

In the case of Koenigsegg, this philosophy communicates not only what the brand sells, but why exists, which is especially relevant for such a unique and artisanal brand.

Based on this logic, we define Koenigsegg's Golden Circle as follows shape:

●■ Why? (Why)

Because the CEO, Christian von Koenigsegg, wanted to bring his dream of creating the maximum exponent of automotive performance, without concessions, and offer customers the possibility of being part of this dream.

●■ How? (How)

Through a tireless pursuit of innovation and perfection, with a particular focus in-house development, which allows absolute control over each detail. This process is combined with a concern for sustainability, giving his creations the status of technological works of art, produced environmentally conscious.

●■ What? (What)

Production of technologically advanced hypercars, developed and manufactured internally,
that
if
highlight
by
break
records
and
by
be,
consistently the fastest and most innovative on the market.

2.5.2 Tone of Voice

In order to align all aspects that are part of or adjacent to the content, we also identified the need to “divide” the tone of voice into 3 parts.

With the aim of providing our audience with a more complex and less one-dimensional when you encounter our content, we chose to establish 3 tones of voice different, yet very similar, adapted to the social networks in which they fit.

They are:

- The brand (Koenigsegg).
- The Founder/CEO (Christian Von Koenigsegg).
- Mascot/Community Manager (Spöke).

In particular, for the content we present here, the focus falls on the two first.

Koenigsegg

(Institutional voice)

Speak with authority. It represents radical innovation, uncompromising performance and rare exclusivity with Swedish signature.

Tone of Voice Pillars

Clear & Confident

Premium, direct and safe language.

Short and objective sentences.

Highlights concrete performance and innovation benefits.

Conveys technical authority without sounding arrogant.

Innovative & Visionary

Emphasizes futuristic engineering and cutting-edge technology.

Key terms: “future”, “avant-garde”, “pioneer”.

Underlines absolute leadership in the “hypersports” segment.

Exclusive & Aspirational

Communication that suggests belonging to a restricted and visionary group.

It reinforces the rare, collectible and disruptive character of the brand.

Creates desire through distinction and exceptionality.

Visually Striking

Short, powerful texts that accompany strong images.

1 to 2 sentences with high intensity.

Strategic use of superlatives: “the fastest”, “the lightest”, “the most advanced”.

Global with Swedish Accent

Subtle references to Scandinavian design: pure lines, functional simplicity, precise engineering.

Direct and technical tone, but with enough warmth to avoid coldness.

It evokes Swedish identity as a symbol of excellence.

Christian von Koenigsegg (CEO)

(Founder and CEO – personal voice of the brand)

He speaks as an inventor, leader and visionary. Humanizes the brand with passion, curiosity and transparency. Inspire and share.

Tone of Voice Pillars

Authentic & Inspiring

Personal, intimate voice, with a mentor tone.

Shares motivations, visions and fundamental values.

Use of “I” and “we” to create connection and authenticity: (“I believe...”/“In our journey...”/“We created this because...”).

Confident & Humble

Celebrates the team and recognizes collective merit.

Admit failures as part of progress.

Mixes achievements with constructive vulnerabilities:

"The prototype surprised us... but we faced it."

"We had to fail to get here."

Visionary & Passionate about Technology

Share future ideas, bold dreams and innovation roadmaps.

Mixes enthusiasm with technical precision.

He speaks with emotion, but also with rigor:

"We are reinventing the impossible."

"Our goal was to eliminate compromises."

Accessible & Engaging

It invites interaction and active listening.

Uses genuine questions and answers to create rapport:

("What would you like to see next?"/"We welcome your comments.")

Maintains premium language without distancing.

Subtly Exclusive

Reveals behind the scenes only to those who follow closely.

Creates anticipation and rewards loyal engagement:

("Soon, I'll share something that few have seen."/"Stay tuned – there's more to come way.")

At Koenigsegg, we chose to work with two very distinct but complementary: that of the brand and that of our founder, Christian von Koenigsegg. The brand voice is clear, confident and innovative. We use a premium language, technical and minimalist design that conveys all our authority in the hypercar segment. We want Koenigsegg to be seen as a reference for extreme performance and cutting-edge engineering, reinforcing our exclusivity and the Swedish heritage that so we value. Our goal is to inspire wonder and desire, making the brand aspirational and almost inaccessible but always desired.

Christian's voice is much more personal and inspiring. He speaks in the first person, sharing their visions, the challenges we face and the ambitions we still have for front. This voice brings us closer to our followers, creates empathy and shows the human side

behind innovation. It is an invitation for everyone to be part of our journey, reinforcing the trust in the brand through the authenticity and humility of our founder.

For us, this combination of a strong institutional voice and a personal voice

Genuine is essential. Together, they make up a complete narrative in which on the one hand a one voice commands respect and fascination, and another generates proximity and connection. This is how we communicate

the true essence of Koenigsegg.

2.5.3 Mood Board

Represented in image 20 of the annex.

In order to maintain a constant design language, we found necessary to develop a moodboard that would allow the department to be capable of making decisions that do not deviate from the brand's "Ethos". We chose to compile tones, textures and "lines" that we believe represent in a way that suits the brand's aesthetics and meets the message we convey.

2.5.4 SMART objectives

Having as main goal the conversion of followers into participants in the event online, three strategic objectives were defined that will allow us to evaluate campaign performance over the two weeks is measurable. These objectives are organized according to the stages of the marketing funnel, ensuring a structured and conversion-oriented.

1st Objective – Increase the number of followers on social media by 10%
main ones (LinkedIn, Instagram and YouTube)

This objective is part of the TOFU stage, where the focus is on capturing attention and increased brand awareness. The aim is to reach a wider audience, expanding the community that follows Koenigsegg and generating recognition for the launch of the new vehicle.

2nd Objective – Obtain a CTR rate of 15% for the landing page,
arising from interactions with each campaign publication.

This objective operates in the MOFU phase, focusing on generating interest and engagement with the content disclosed. By encouraging clicks on publications, the aim is to drive the target audience to the event landing page, allowing an effective transition between interest and the intention.

3rd Objective – Convert 30% of landing page visitors into registrations on the website event and, consequently, in the brand's newsletter.

This third objective corresponds to the BOFU phase, in which the aim is to transform interest generated in real conversions. The focus is on ensuring that a significant portion of visitors to the landing page register for the event, while integrating in the Koenigsegg database, creating a closer relationship with the brand. All objectives described here will be in force during the two-year period. campaign weeks. At the end of this period, they will be used as criteria to evaluate its success and real impact on the target audience.

2.6 Campaign

Reinforcing the context defined so far, this campaign's main purpose of generating buzz around the launch of Koenigsegg's 10th vehicle, which coincides with the celebration of the brand's 25 years of existence. To this end, a duration of two weeks was defined for the campaign, a period in which all actions will be aimed at maximizing reach and conversion with the target audience. So far, this report has presented in detail all the analysis which supported the strategic definition of the pre-launch. From this point on, the focus shifts to be in the practical component of the campaign, demonstrating how it will be executed. So, The next topics will cover:

1. ■ Marketing Ecosystem – It will be explained how the team will connect the points of contact between public and brand (website and social media), associating previously defined objectives.

2. ■ Final Content and Creative Justification – The pieces of communication developed, accompanied by an explanation of its strategic logic based on the AIDA methodology (Attention, Interest, Desire, Action).

3. ■ Campaign Calendar – Finally, this topic will present the materialization campaign practice. A publication plan will be structured with specific dates assigned to each piece of content.

In this way, a clear articulation between analysis, strategy and its implementation is ensured. practical execution, ensuring the coherence, relevance and effectiveness of the campaign, within a scenario as close as possible to your real application.

2.6.1 Ecosystem

As represented in image 21 of the annex, the content launch strategy was designed to maximize reach among the target audience, with emphasis on the

YouTube and the brand's website, considered the main dissemination channels. At the same time, publications will be launched on Instagram and LinkedIn, reinforcing the campaign's presence on social media. At this stage, the content will include a CTA that links to a landing page, where you can register for the online event free of charge.

During the remaining period of the campaign, a continuous publication of content on LinkedIn and Instagram, with the purpose of increasing traffic to the same landing page and, consequently, increase the number of subscribers.

It is also important to note that the in-person event will feature special guests, namely friends of the CEO and the Koenigsegg team, as well as model owners previous brands. For this reason, the entire digital aspect of the campaign focuses on conversion to online tickets, allowing wider audience engagement.

2.6.2 Content

2.6.2.1 Video

The video (which is in the folder attached to the report), together with the content editorial that will be presented in the following subtopic, will mark the beginning of the campaign. This choice is related to the fact that these formats better adapt to the initial objective of any campaign, where the aim is to better explore both the emotion and the message.

In the specific case of the video, it will be published on YouTube and will last 2 minutes and 16 seconds.

The storytelling will be easy to understand. It will begin with the testimony of the father of CEO, sharing how and when the vision that gave rise to the brand's journey emerged. Throughout the video, the most important milestones in Koenigsegg's evolution will be portrayed: the progress achieved, the iconic models developed, the growth of the team and the role essential part of the fan community. These last two pieces — team and public — are portrayed as fundamental to the success and growth of the brand to this day.

The video ends by reinforcing the idea that, although the path already taken is remarkable, the future is yet to be written. Proof of this will be the new model, which will be presented at the Paris AutoShow 2025, on September 30th.

The aim of the play is to convey that it all started with a dream and that it was thanks to everyone who believed and shared that this dream evolved.

2.6.2.2 Editorial Content

24 years ago, on September 30th, I was backstage at the Paris Auto Show, waiting for the CC8S to be wheeled out to the crowd, eager to see everyone's reaction to this creation that me and the team worked so hard to unveil.

At that moment, I didn't think about the possibilities and what could be; I simply wanted people to see it, wanted people to get excited for this machine and this dream that began as a couple of rough sketches done in my parent's bedroom.

No thoughts of the CCR, the Agera, or the Jesko, no thoughts of Freevalve or DDT, nor any other models and technologies our company has produced over the years. A few people have come and gone, some teams changed, some expanded, and some became their own thing, like Freevalve.

Eight models were released since that pleasant September day:

1. 2002 – Koenigsegg CC8S
2. 2004 – Koenigsegg CCR
3. 2006 – Koenigsegg CCX
4. 2011 – Koenigsegg Agera
5. 2015 – Koenigsegg Agera RS
6. 2016 – Koenigsegg Regera
7. 2021 – Koenigsegg Jesko
8. 2022 – Koenigsegg Gemera
9. 2023 – Koenigsegg CC850

And what a ride it has been, with every following release. Koenigsegg has continued to push the envelope when it comes to performance and driving experience, always looking to improve on what's been done.

We have seen many competitors come and go, others keep pushing and being pushed by, never letting them rest on their laurels and hoping they do the same for us.

And that brings us to today. I'm not one much for sentimentalism, but even I know the importance of a 25-year anniversary, a quarter century of car manufacturing and automobile development that started as an idea in the mind of a young Swedish boy.

We don't plan to let a date of such importance go by without recognizing it, and certainly not without something worthy of such a date. And so, with that idea in mind, Koenigsegg will be present at the 2025 Paris Auto Show, on September 30th, at the exact same spot and show where it all started for young Christian von Koenigsegg.

Thank you for taking this journey with us and "KVARTSSEKELsjubileum."

Christian Von Koenigsegg

CEO, Koenigsegg

2.6.2.3 Publications

Visual representation in image 22 and group of images 23 of the annex.

Instagram

Koenigsegg's presence on Instagram was designed as a continuous narrative, visually cohesive and emotionally engaging, which guides the audience through the essence of the brand from extreme engineering to the history that defines us. Publications follow a structure reverse chronological, functioning as a symbolic countdown to the heart brand, the Jesko, a model that best represents Christian von Koenigsegg's vision. Each post represents an emblematic model and highlights its technical importance, historical or disruptive. Since the ONE:1 and Agera RS, which redefined the relationship between weight and power, up to the Gemera, which revolutionized the concept of a family GT with performance of hypercar.

The content was complemented by a special Reel, created as a teaser for a event in France, serving as a subtle spoiler for the reveal of a new model. The video, focused on sound and light, managing to cause mystery and anticipation among followers, reinforcing the brand's DNA of exclusivity and innovation. This publication not only increased the engagement, as it served as an emotional bridge with the most loyal community.

The language used in texts and titles seeks to balance technical precision with inspiration, a formula that respects both hardcore engineering fans and passionate about design and performance. Finally, the discreet and elegant Calls to Actions, such as mentions of the official website or clues about future releases, ensure that each interaction with the page is intentional, refined and aligned with the company's premium positioning Koenigsegg.

The publications on the LinkedIn page of the CEO, Carlos Von Koenigsegg, aimed highlight Koenigsegg's innovation, evolution and pioneering spirit. Focused on key models such as CC8S (history and resilience), Regera (revolutionary engineering), CCX (ambition global) and Jesko (technology leadership with LST). The objective was to strengthen the narrative of brand, maximize engagement and reinforce Koenigsegg's image as a leader in innovation in the high-performance automotive sector.

Linkedin

Publications made on the LinkedIn page of the CEO, Carlos Von Koenigsegg, had as its fundamental purpose to highlight the innovation, evolution and pioneering spirit of Koenigsegg. To this end, key models such as the CC8S and the CC prototype stood out, highlighting the history and resilience of the brand since its inception.

The Regera was used to highlight the company's revolutionary engineering, while the CCX highlighted the ambition of global homologation and the expansion of the company's presence Koenigsegg.

Ultimately, Jesko served to demonstrate continued technological leadership and cutting-edge innovation, exemplified by Light Speed Transmission (LST). The objective The main factor behind the creation of this content was to maximize audience engagement, strengthen the brand's narrative of excellence and, consequently, increase its visibility and recognition, celebrating achievements and inspiring the global community.

2.6.2.4 Email Marketing

Visual representation in image group 24 of the annex.

Our goal with email marketing is to establish an automated response which will reach those who provide us with their email on the landing page created especially for the event.

They only contain a reference to the event and its date and three CTAs, one to watch to the “live stream”, one to purchase tickets and another to add the date to your calendar.

A simple email with little information, and images that reference the anniversary of the launch, quick to read and “digest”.

2.6.2.5 Website + Landing Page

Visual representation in group of images 25 of the annex (Link also present).

The landing page was designed with a simple and direct design, containing only the brand logo and a form for collecting essential data: email, name, age, gender and occupation.

Submitting this form triggers the automatic sending of an email to the user, containing more information about the event. This email also includes several Strategic CTAs, namely: direct access to the launch livestream, possibility to purchase tickets and an option to add the date to the user's personal calendar.

At this point, there is no audience segmentation. This component will be introduced at a later stage, after the initial data collection, allowing a more personalized and effective communication.

2.6.3 Scheduling

Calendarization | September 16th to 31st

16 (Friday)

- Website: Editorial content + Landing Page.

- LinkedIn: CEO writing.

17 (Saturday)

- Instagram: First reference to the Show.

- YouTube: Main video (launch or announcement).

18 (Sunday)

- (no publications planned).

19 (second)

- Instagram: Video.

- Email Marketing: direct to Landing Page.

21 to 29 (Wednesday to Thursday)

- Instagram: Daily post about the car.

- LinkedIn: Daily publication about the car.

- YouTube: Daily shorts about the car.

31 (Saturday)

- YouTube: Post-event video.

3. Conclusion

According to the analysis carried out at Koenigsegg and its competitors, both level of social networks as well as micro and macro environments, we developed a structure strategy that we consider effective in reaching our target audience, represented by previously defined personas.

The campaign aims to guide the public through all the brand's channels, starting on YouTube and the website, with content with greater reach and impact. From there, communication evolves to Instagram and LinkedIn, where a presence will be maintained consistent, with content designed to inform and engage the audience so far of the event and the big launch.

Each piece of content is carefully tailored to the target audience and platform in which it will be published, respecting the specificities of each social network. This guarantees not only coherence of tone and aesthetics, as well as optimizing performance with algorithms of platforms.

With this integrated approach, we aim to position the launch as a standout moment in the highly competitive hypercar market, ensuring that the Koenigsegg remains top of mind for its audience, both now and in the future.
