OMEGA

Business: Omega Estore (Vertically Integrated Brand

- VIB).

Description: D2C (Direct-to-Consumer) global on Shopify.

Value Proposition: Sale of "Core" and accessories with 100% margin capture.

Use of trusted technologies such as Augmented Reality (AR) and 3D for "proof virtual" of watches, eliminating doubts about size and style when purchasing remotely.

Differentiation: Limited Editions Inventory exclusive to physical boutiques (strategy of scarcity), while digital focuses on convenience and input models.

MODEL OF

MONETIZATION

Direct Sales of Products: Main focus on Watches (e.g.:

Moonwatch), Bracelets, Jewelry and Accessories.

After-Sales Services: Revenue from sequences of maintenance and repair services ("Service revenue").

Cross-sell and Upsell: Value increase strategy through sale of extra bracelets and complementary accessories.

Total Sales (Revenue - Value Sold)

Total Purchases (Purchases - Number of orders)

Products (Watches) Sold

TOOLS

Question

Response and Application to Project Omega

What is the Conversion Rate?

It is the percentage of website visitors who complete the end goal (in this case, a purchase). Measures website effectiveness

in transforming "onlookers" into customers.

Where to see and how to calculate?

Where to see: Shopify Dashboard ("Online Store Conversion Rate") and Google Analytics 4 (1st - Reports; 2nd - Monetization;

3rd - User purchase journey - This report presents the sales funnel step-by-step, showing how many users started the session and how many actually advanced to the final purchase stage (Purchase), allowing us to identify where the biggest dropouts occur).

S

o

)

100

How to improve? (If it is below the expected)

1. Visual Confidence (AR): Improve the Virtual Try-On (3D) experience to reduce the "how it looks on the wrist" question.
2. Speed: Optimize the loading of high-resolution images (WebP) to avoid dropouts.
3. Checkout Friction: Implement Shop Pay and Apple Pay for 1-Click Purchases and Offer Installments (Klarna/Splitit).

STRATEGIC REFLECTION - RATE

CONVERSION

Question

Response and Application to Project Omega

What is the Average Order Value?

It is the average monetary value spent by each customer in a single transaction. Indicates whether the Customers are buying just the basics or adding extras.

Where to see and how to calculate?

Where to see: Shopify Sales Reports. Google Analytics 4 (1st - Reports; 2nd - Monetization; 3rd - Overview; 4th - Make the calculation: $\text{Total Revenue} \div \text{Total Purchases}$).

How to improve? (If it is below expectations)

1. Smart Cross-Selling: Suggest compatible straps (NATO, Leather) in the "cart side" before payment.
2. Bundles: Create "Watch + Travel Case" kits with a price advantage over the purchase isolated.
3. Premium Services: Offer the option of "Extended Warranty" or "Engraving Personalized" at checkout as a paid add-on.

STRATEGIC REFLECTION - AVERAGE

ORDER VALUE (AOV)

Question

Response and Application to Project Omega

What is CLTV?

It is the total profit or revenue that a customer is expected to generate for the brand over the entire your relationship, and not just the first purchase.

Where to see and how to calculate?

Where to see: Shopify Customer Data Export (Cohort Analysis) or Calculated in Excel/Looker Studio. Google Analytics 4 (1st - Explore; 2nd - Template Gallery; 3rd - User lifetime - This exploration tool creates a specific report that calculates the value users' accumulated monetary value (LTV) from their first purchase to date current).

Simplified Formula: Average Value (AOV) × Annual Purchase Frequency × Lifetime of the Customer

How to improve? (If it is below expectations)

1. Maintenance Cycle: Email Automation (Klaviyo) after 24-36 months remembering the need for official review (Paid Service).
2. Exclusive Access: Priority when purchasing Limited Editions ("Snoopy", "Ed White") for old customers, encouraging loyalty.
3. Community: Invitations to digital events in the Metaverse or physical events in Boutiques, keeping the brand in the customer's mind (Top of Mind).

STRATEGIC REFLECTION - CLIENT

LIFETIME VALUE (CLTV)
