Link Building/Off-Page SEO Strategies

What are Backlinks?

Links from other websites, which are considered votes of confidence, by search engines.

The more quality backlinks a website has, the higher its authority.

Objective

Increase the authority of the Shifter.pt website and improve positioning in search engines search, generating qualified organic traffic.

XShifter Ecosystem

Objective: Ensure the presence and visibility of backlinks (with Shifter destination) on websites that are associate with us. Boost the XShifter ecosystem.

Partnerships with Content Creators/Brands

Even though there is the possibility of producing content as part of a campaign advertising, preference falls on the non-sponsored variety.

Objective: To partner with content creators to produce content for our page.

Partnerships with Content Creators

An article about politics written by a politician
certificate

or

by

a

entity

official government will have a score

high in E-E-A-T (Experience; Specialization;

Authority; Reliability) in comparison

with an article about politics written by

someone without credentials.

Content Quality Assessment Guidelines

Publishing “Linkable” Content

Content with scientific bases and
educational

Sources and references to studies

Link to “partner” articles

frequent and proper

Objective: Content that naturally justifies the presence of links from other sites.

Recovery of Lost, Inactive or Missing Links

The absence of a link to our website in the article of Expresso represents an opportunity

lost

of

traffic

and

authority,

highlighting the importance of monitoring and

fix dead, lost or missing links.

Objective: Fix links with 404 error, mentions without links.

Recovery of Lost, Inactive or Missing Links

Some of the “collaborative” links

They currently do not have “hosting”

Browser returns (from

organic form) our

page, a page that doesn't

is available

None of the suggestions lead to the

subscription

Redirection is a necessity

Quality Directories and News Catalogs

Sapo Blogs

Google Publisher Center

Substack

Objective: Achieve “placement” of our website in directories that bring us authority and credibility, which will facilitate our “delivery” by search engines

Partnerships with Universities and Research Centers

Objective: Participate in projects with academic entities.

Have backlinks from institutional domains.

Monitoring Metrics

Key Metrics

Average time on page (and scroll depth)

(On)

Shows whether people are really read the articles. Have organic traffic

It's not much use if you abandon the content after 10 seconds

Check if the average time is approaches the estimated time of reading

Relate to the depth of

scroll: Have you reached the end or

Did they stop at the second paragraph?

Organic Click Rate

(CTR) (Off/On)

We can appear at the top of Google and even then, no one clicks, if the title/goal are not appealing

Monitor CTR per page and CTR by "keyword"

Compare with the average position, if we are in 2nd place with 4% of CTR, there is room for improve.

Non-organic traffic

branded (landing page)

(Off)

Shows how many people are discover the "shifter" through the themes, not because they already know the brand

Filter for keywords that don't include "shifter"

Check which pages are
attract more new visitors
